

PS13AZ Fire Powerball Butterfly Valve

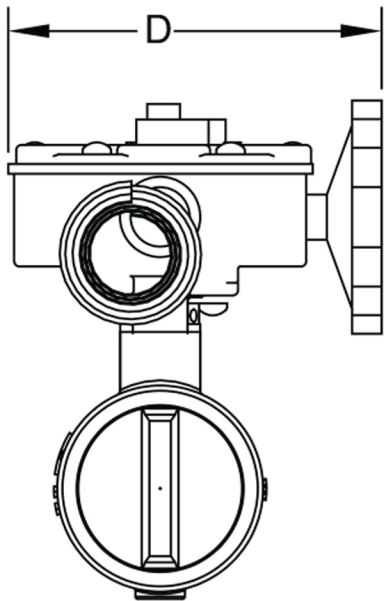

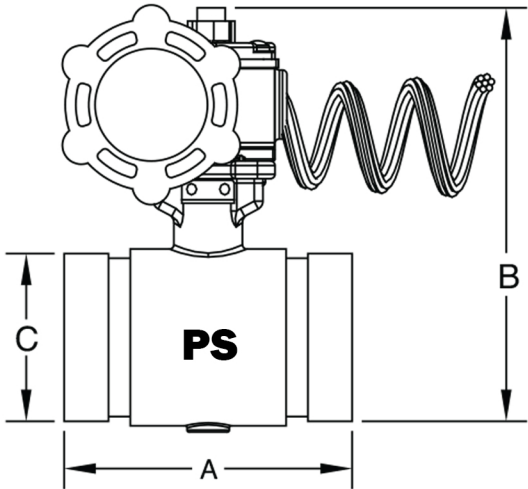

Size: 1”
Weight: 1.5 kg
Tamper Switch: Built-in
Actuation: Low torque

Key Features:

- 1. Easy System Shutoff:** Enables efficient maintenance and repair of sprinkler systems with smooth 1/4 turn closure, minimizing system disruption.
- 2. Grooved End Connections:** Facilitates quick and secure installation using grooved pipe couplings, ensuring reliable, leak-free joints.
- 3. Low Torque Actuation:** Requires minimal effort for operation, enhancing usability during maintenance procedures.
- 4. Built-in Tamper Switch:** Includes a tamper switch that detects movement from the fully open position, providing feedback to alarm systems and enabling integration with additional equipment for immediate notification.
- 4. Open Position During Operation:** Must remain open during system operation to maintain proper water flow and ensure effective fire protection.

In summary, the PS13AZ Fire Powerball Butterfly Valve with grooved connections is a dependable solution for sprinkler control, featuring easy shutoff functionality, anti-water hammer technology, secure grooved connections, and a built-in tamper switch for enhanced system monitoring and safety.

PS13AZ Fire Powerball Butterfly Valve

Size: 1 1/2"

Weight: 1.5 kg

Tamper Switch: Built-in

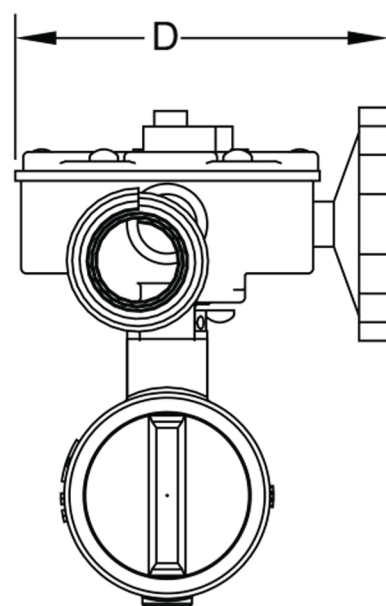

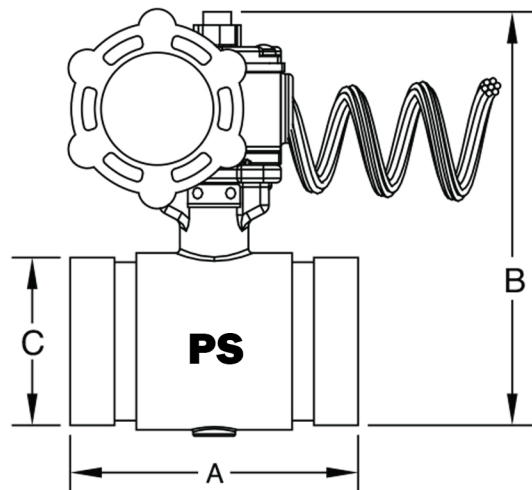

Actuation: Low torque

Key Features:

- 1. Easy System Shutoff:** Enables efficient maintenance and repair of sprinkler systems with smooth 1/4 turn closure, minimizing system disruption.
- 2. Grooved End Connections:** Facilitates quick and secure installation using grooved pipe couplings, ensuring reliable, leak-free joints.
- 3. Low Torque Actuation:** Requires minimal effort for operation, enhancing usability during maintenance procedures.
- 4. Built-in Tamper Switch:** Includes a tamper switch that detects movement from the fully open position, providing feedback to alarm systems and enabling integration with additional equipment for immediate notification.
- 4. Open Position During Operation:** Must remain open during system operation to maintain proper water flow and ensure effective fire protection.

In summary, the PS13AZ Fire Powerball Butterfly Valve with grooved connections is a dependable solution for sprinkler control, featuring easy shutoff functionality, anti-water hammer technology, secure grooved connections, and a built-in tamper switch for enhanced system monitoring and safety.

PS13AZ Fire Powerball Butterfly Valve

Size: 1 1/4"

Weight: 2.2 kg

Tamper Switch: Built-in

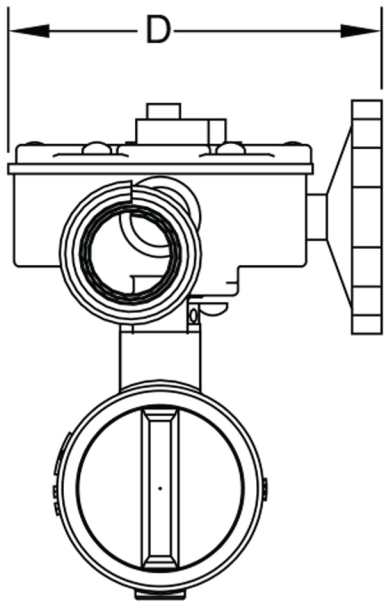

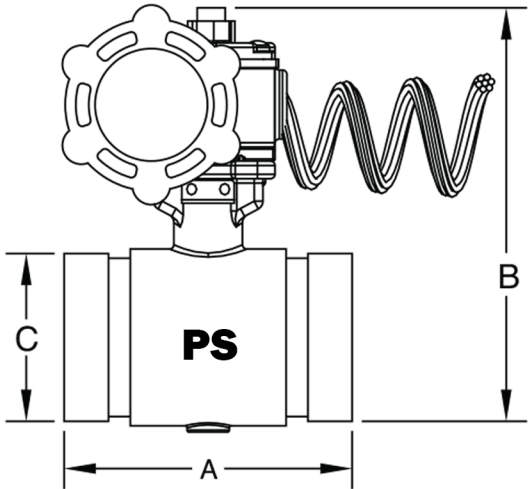

Actuation: Low torque

Key Features:

- 1. Easy System Shutoff:** Enables efficient maintenance and repair of sprinkler systems with smooth 1/4 turn closure, minimizing system disruption.
- 2. Grooved End Connections:** Facilitates quick and secure installation using grooved pipe couplings, ensuring reliable, leak-free joints.
- 3. Low Torque Actuation:** Requires minimal effort for operation, enhancing usability during maintenance procedures.
- 4. Built-in Tamper Switch:** Includes a tamper switch that detects movement from the fully open position, providing feedback to alarm systems and enabling integration with additional equipment for immediate notification.
- 4. Open Position During Operation:** Must remain open during system operation to maintain proper water flow and ensure effective fire protection.

In summary, the PS13AZ Fire Powerball Butterfly Valve with grooved connections is a dependable solution for sprinkler control, featuring easy shutoff functionality, anti-water hammer technology, secure grooved connections, and a built-in tamper switch for enhanced system monitoring and safety.

PS13AZ Fire Powerball Butterfly Valve

Size: 2"

Weight: 2.8 kg

Tamper Switch: Built-in

Actuation: Low torque

Key Features:

- 1. Easy System Shutoff:** Enables efficient maintenance and repair of sprinkler systems with smooth 1/4 turn closure, minimizing system disruption.
- 2. Grooved End Connections:** Facilitates quick and secure installation using grooved pipe couplings, ensuring reliable, leak-free joints.
- 3. Low Torque Actuation:** Requires minimal effort for operation, enhancing usability during maintenance procedures.
- 4. Built-in Tamper Switch:** Includes a tamper switch that detects movement from the fully open position, providing feedback to alarm systems and enabling integration with additional equipment for immediate notification.
- 4. Open Position During Operation:** Must remain open during system operation to maintain proper water flow and ensure effective fire protection.

In summary, the PS13AZ Fire Powerball Butterfly Valve with grooved connections is a dependable solution for sprinkler control, featuring easy shutoff functionality, anti-water hammer technology, secure grooved connections, and a built-in tamper switch for enhanced system monitoring and safety.
